

What do I do if I am a...

Contract Worker

If you work for a company that contracts to TransGrid, you must be registered in the WSAT system as a worker. Your registration will be completed by your company, in most cases. You will have a profile in the system where your qualifications, competencies (licenses, tickets, records etc.) and training history will be recorded.

01

Ensure you have been registered in WSAT by speaking your company Contractor Administrator or TransGrid Site Representative.

02

Receive and carry your Pegasus ID Card with you at all times whilst working on a TransGrid project/site.

03

Present your Pegasus ID card when asked by a TransGrid Site Rep to complete a check of your authorisations and training records.

04

Contact Pegasus on 1300 441 433 or TransGrid@Pegasus.net.au if you encounter any issues
